A data scientist aiming to leverage strong skills in machine learning, statistical analysis, programming, and communication to assist organizations in making data-backed decisions and maintaining machine learning systems.

Education

Master's of Science, Data Science. Western Governors University, Salt Lake City, UT. (2026)

- Course work included courses on gathering and preparing data, statistical analysis, database management, machine learning, visualization and reporting, model deployment, and neural network creation and management.

Bachelor's of Science, Mathematics Education. Oral Roberts University, Tulsa, OK. (2022)

- Course work included mathematics courses including Advanced Calculus and Probability and Statistics, programming courses covering C, Java, SQL, and pedagogy courses covering communication and management.

Experience

Math Teacher, Rockwall-Heath High School, Heath, TX. *August 2022 - May 2023*

- Communicated complex mathematical concepts to students clearly and concisely.
- Collected student performance data from online learning management systems and analyzed that data in Excel to identify trends in student performance.

Math Tutor, Oral Roberts University, Tulsa OK. *August 2019 - April 2022*

- For six consecutive semesters, tutored five students per week in advanced math courses in both individual and group settings.

Skills

- Programming in Python, SQL, R, and Java, JavaScript, HTML, and CSS.
- Project management tools such as Git and Docker, DVC, and MLFlow.
- Data Analysis and Visualization with Numpy, Pandas, Matplotlib, Seaborn, Tidyverse, GGPlot, and Tableau.
- Machine Learning with PyTorch, Scikit-Learn, StatsModels, and TidyModels.
- Experience creating predictive models, computer vision networks, and natural language processing networks.

A host of projects illustrating these skills are available on my website: sbush111.github.io.
