sbush111.github.io

Data scientist aiming to leverage experience in machine learning, statistical analysis, programming, and communication to assist organizations in making data-backed decisions.

Education

Master's of Science, Data Science. Western Governors University, Salt Lake City, UT.
November 2024 – May 2026.

- Relevant coursework: data gathering and preparation, statistical analysis, database management, machine learning, visualization and reporting, and model deployment.

Bachelor's of Science, Mathematics Education. Oral Roberts University, Tulsa, OK.
August 2018 – April 2022. Summa cum laude.

- Relevant coursework: probability and statistics, introductory and intermediate programming.

Experience

Math Teacher, Rockwall-Heath High School, Heath, TX. *August 2022 – May 2023.*

- Instructed 120 students across Geometry, Statistics, and Calculus. Clearly communicated complex concepts. Analyzed student performance data in Excel to inform instructional decisions. Contributed over 100 resources to a shared pool of teaching materials.

Math Tutor, Oral Roberts University, Tulsa, OK. *August 2019 – April 2022.*

- Tutored five university students per week in advanced mathematics courses.

Skills

- Programming in Python, SQL, R, and Java.
- Project management with Git, Docker, DVC, and MLFlow.
- Data Analysis and Visualization with Pandas, Matplotlib, GGPlot, and Tableau.
- Machine Learning with PyTorch, Scikit-Learn, StatsModels, and TidyModels.

Projects

- Performed regression analysis with StatsModels to identify poverty rate as a statistically significant predictor of literacy scores in the United States.
- Designed a normalized database schema for non-normalized library data, and implemented it using PostgreSQL.
- Designed and trained a convolutional neural network using PyTorch to determine image equivalence, despite such differences as cropping or artifacting.
